Mahesh More
Software developer

CAREER SUMMARY

Looking for challenging role so that I can use my skill and capabilities through sincere dedication and hard work for successful career.

PERSONAL PROJECTS

Bank of Baroda (Html, CSS, Java, Spring boot)
- It is a very helpful project for every bank user.
- The most important purpose for developing this project is to create a bank account, add deposits, withdraw balance and check current balance.
- I have created a login user and an admin user. Both users will give correct username and password, then open Bank of Baroda home page after user can do next bank process.

Pharmacy Store (Html, CSS, Java, Spring boot)
- It is a very helpful project for every medical shopkeeper.
- The most important purpose for developing this project is to store new and old tablet information.
.

Online Voting System (Html, CSS, Java, Spring boot)
- I have developed an Online Voting System web application.
- I have created a login user and an admin user. Both users will give the correct username and password, then open the online voting home page after the user can do next voting process.
- I have been using Marathi because this web application will use all Maharashtrian.

Home Booking System (Html, CSS, JS, PHP, MySQL)
- Home booking system is a web application designed to booking home or purchase property.
- The most important purpose of developing this project is to booking home and complete your dream of dream home.
- In this web application I did use AI chatbot service because any problem occurs at home booking time then user will use chatbot and search query then will come quick reply of your question.
