PROFESSIONAL SUMMARY

Salesforce Developer / Junior Salesforce Engineer with 1 year of hands-on experience in delivering end-to-end Salesforce implementations in a service-based environment. Proficient in Apex, Triggers, Flows, Lightning Web Components (LWC), and Salesforce Administration. Experienced in understanding client requirements, building custom solutions, automating processes, and integrating Salesforce with external systems such as QuickBooks Online.

TECHNICAL SKILLS

- Programming Language: Apex, Lightning Web Components (LWC)
- Salesforce Automation: Flows, Trigger
- Salesforce Administration: Objects, Fields, Validation, Security, Reports, Dashboards
- Integration & APIs: REST APIs, Postman
- Tools: VS Code, Salesforce Lightning Studio, GitHub, Data Loader, Workbench
- Core Java, MySQL, Html, CSS

PROFESSIONAL EXPERIENCE

DELIPAT IT Pvt. Ltd, Salesforce Developer

- Developed and customized Salesforce solutions using Apex, Triggers, Flows, and LWC based on client requirements.
- Worked on Salesforce administration including object configuration, fields, validation rules, and security settings.
- Designed and implemented custom objects and automation to support various business use cases.
- Performed bulk data migration and updates using Data Loader and Workbench.
- Created Reports and Dashboards to deliver actionable business insights.
- Supported Salesforce–QuickBooks Online integration and resolved sync issues.

PROJECTS

Center of Pain Controller

- Handled Salesforce administration for Law Firm, Patient, and Contact data using standard objects.
- Implemented Flows for business process automation.
- Performed bulk data upload using Data Loader and Workbench.
- Built Reports, Dashboards, and configured Einstein Activity Capture.
- Applied field-level validation rules to ensure data accuracy.

Law Firm Management System (Salesforce + QuickBooks)

- Created custom objects such as Invoice, Expense, and Payment Intent.
- Used standard Account object for QuickBooks customer synchronization.
- Developed Apex Triggers for automation and business logic.
- Built custom Invoice Creation UI using Lightning Web Components (LWC).
- Configured Classic Email Templates and Email Alerts.
- Generated Reports and Dashboards for financial tracking.
